FLOW CAGE ASSEMBLY

FLOW CAGE FEATURES

- Patented, easily replaceable flow unit featuring ceramic-bearing technology for long-lasting performance
- Low-maintenance, easy-to-clean flow sensor
- Precisely measures water flow through the cell for optimal operation
- Helps track pool water turnover for improved efficiency
- Alerts you when it's time to clean or replace your filter

ACCUCHLOR
SALT CHLORINE GENERATOR

ORDERING INFORMATION

AC40 CELL AND CONTROLLER COMBO	60-9040
AC40 CELL ONLY	60-8040
CONTROLLER ONLY	60-8100

KEEPS POOLS CLEAN WITH JUST SALT

ACCUCHLOR
SALT CHLORINE GENERATOR

- Minimizes the use of harsh chemicals
- Maintains a clean pool with simple salt chlorination
- Simple operation – just set up and add salt
- Precision flow meter tracks filtration and water turnover

ACCUCHLOR CONTROLLER

Take total control of your pool with the AccuChlor Controller. Precisely adjust chlorine output and monitor real-time water flow directly on the LCD display, or check in from anywhere using the AccuChlor app on your smartphone or tablet.

ACCUCHLOR CELL

Converts salt water into chlorine through electrolysis

The AccuChlor cell is compatible with the Pentair® SCG (Salt Chlorine Generator) Power Center, and the AccuChlor controller connects to a standard power center or to Pentair® EasyTouch® and IntelliCenter® automation systems.

SIMPLE TO SET UP

The AccuChlor system features a dedicated controller for fast, straightforward installation. Once the cell is installed, simply plug it into the controller and connect the controller to your standard power center, EasyTouch®, or IntelliCenter® system. Download the AccuChlor app to monitor and manage your system remotely from your smartphone.

WORKS WITH

- Standard Power Center
- IntelliCenter
- EasyTouch

IntelliCenter® and EasyTouch® are registered trademarks of Pentair. SwimSense is not affiliated with or endorsed by Pentair

ACCUCHLOR SALT CHLORINE GENERATOR

EFFORTLESS CHLORINATION WITH FEWER HARSH CHEMICALS

Chlorinated water exits the cell and returns to the pool

Salt water flows into the cell through the flow cage

Through electrolysis, salt water is converted into chlorine for simple, effective sanitization

EASY TO USE AND MAINTAIN

- Simply add salt to your pool and set your desired chlorine output. AccuChlor then delivers consistent chlorine generation for simple, reliable sanitization
- Reduces dependence on harsh chemicals
- Delivers stable, reliable chlorination
- Cell blades are easy to clean with a simple acid wash
