AQUACOLORS **POOL LIGHT | 4”**

ENGINEERED FOR MAXIMUM HEAT DISSIPATION

Stainless Steel Heatsink Core:
Crafted from solid marine-grade stainless steel for superior corrosion resistance and high thermal conductivity.

Patented Cooling Groove Design:
A precision-machined groove system on the rear housing creates a forced water-flow channel – guiding cooler water from the bottom of the fixture upward as the light operates.

Natural Water Circulation Effect:
This passive “chimney” action continuously moves cooler pool water over the heatsink surface, maintaining lower LED junction temperatures.

Up to 40% Lower LED Operating Temperature:
Compared to standard sealed polymer housings – extending LED lifespan and maintaining consistent brightness over time.

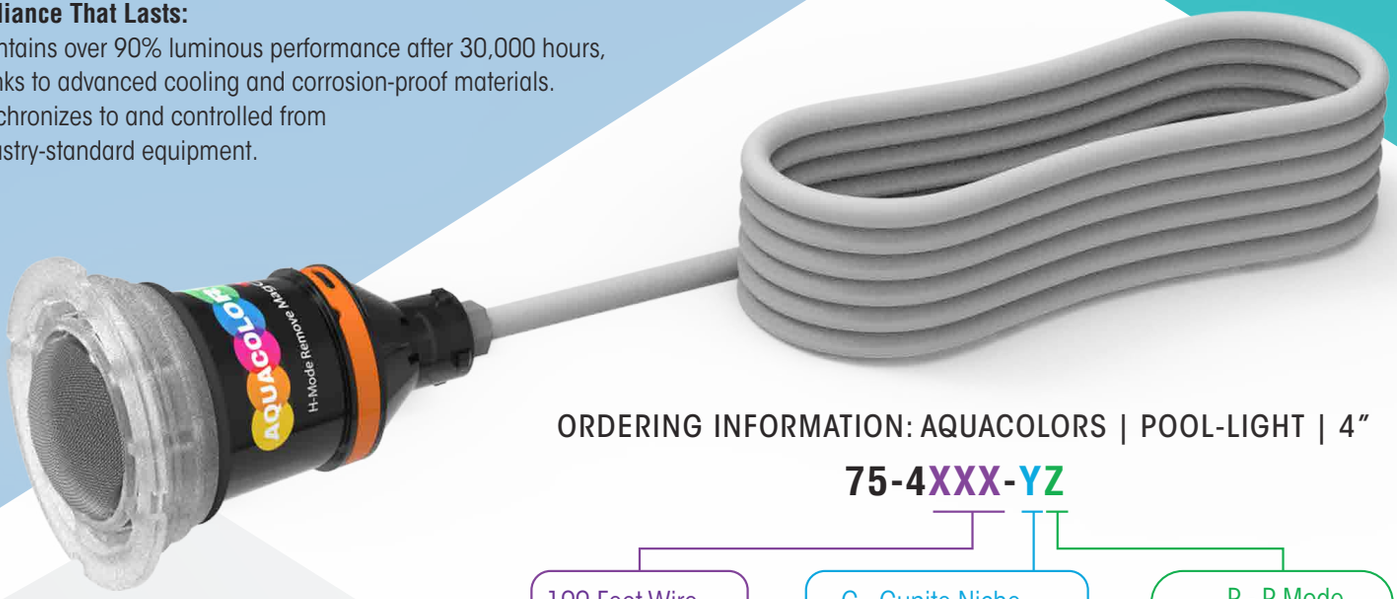

HIGH LUMEN OUTPUT

Powerful LED Core:
Delivers a full 2300 lumens of luminous output – producing the brightness of larger fixtures while maintaining compact form and low energy draw.

Balanced Beam Geometry:
Paired with the lenticular lens, the output is evenly distributed across the pool floor and walls, creating uniform brightness from edge to edge.

Brilliance That Lasts:
Maintains over 90% luminous performance after 30,000 hours, thanks to advanced cooling and corrosion-proof materials.
Synchronizes to and controlled from industry-standard equipment.

4” POOL LIGHT NICHES — BUILT FOR EVERY POOL TYPE

ENGINEERED TO FIT, DESIGNED TO LAST

Our precision-molded light niches provide secure, watertight mounting for your LED pool lights – no matter the pool surface. Each model is crafted for durability, corrosion resistance, and effortless installation.

GUNITE NICHE
INCLUDES RED PLASTER COVER

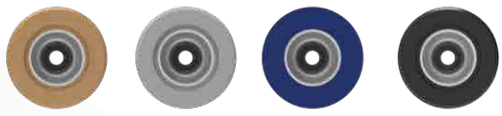

Includes Red Plaster Cover for use during pool construction

PERFECT FOR: CONCRETE / GUNITE POOLS

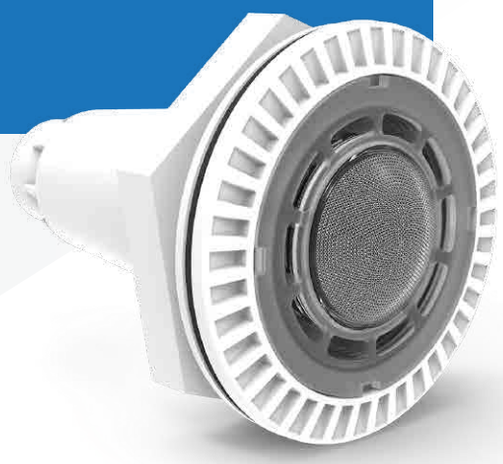

- Heavy-duty body designed to embed securely in concrete
- Includes Red Plaster Cover for use during pool construction
- Compatible with standard 1.5" conduit fittings
- Includes 4” pipe and Reducer
- Designed for long-term performance under high-pressure plaster applications

Gunite Niches are also available in

TAN GRAY BLUE BLACK

FIBERGLASS NICHE

PERFECT FOR: FIBERGLASS POOLS AND SPAS

- Flush-mount rim for a seamless finish against fiberglass shells
- Molded reinforcement ribs for enhanced rigidity
- Easy installation with minimal trimming
- UV-resistant ABS/Polycarbonate construction

VINYL NICHE

PERFECT FOR: VINYL-LINER POOLS

- Wide, gasketed faceplate ensures a watertight seal
- Designed to accommodate liner thicknesses with precision
- Snap-fit light holder for quick maintenance
- Corrosion-resistant, long-life materials for stable performance

CHANGING THE LIGHTS' PROGRAM IS EASY WITH MAGCLIP™

AquaColors MagClip™ makes changing the lights' program much simpler. Place the MagClip™ to the left or right or remove it, allowing for easy selection between P, J, and H modes.

MagClip™ is not available with white only lights.

FOR P MODE

PLACE MAGCLIP™
TO THE LEFT

FOR J MODE

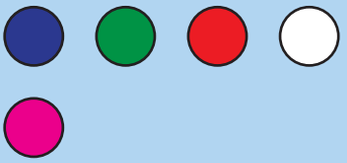

PLACE MAGCLIP™
TO THE RIGHT

FOR H MODE
